

## BUDAPEST MEETING AND STAFF TRAINING

### In This Issue

- 
- 1 EntreCom4All transnational meeting
  - 2 Staff training
  - 3 Planning the platform launch

EntreCom4ALL is an innovative ERASMUS+ funded project which supports the development of entrepreneurs across Europe. The online platform will help users to reflect and self-assess their entrepreneurial competencies to identify potential areas of improvement.

Between 20 and 24 of May the five partnering institutes had their consequential 3rd transnational meeting and staff training. In these days we have made a follow up with our current state of the platform and the project.

We have covered the main questions of our target groups – young and female entrepreneurs, teachers and trainers and also the dissemination of our project. While at the staff training we had the ability to share the word of our project between the attendance and we could receive feedback from them for the platform.

Also we had the ability to see how entrepreneurial incubation works in the H13 Entrepreneurial Incubation House and Program. We had the ability to speak about the possibilities and facilities that entrepreneurs can use in the program, from office space to legal aid.

**Thank you very much for the attention!**
