An OER Platform to become a better entrepreneur

The 1st of October, the IT Team of the entrecom4All project has released a new version of the platform. This version includes major improvements in the search of OER as well as new features.

★★★★★ Why schools should teach entrepreneurship

★★★★☆ Self-efficacy: your secret weapon when you think you can not make it.

★★★★☆ 4 ways to build a human company in the age of machines

★★★★☆ The simple reason why emerging companies succeed

★★★★☆ Why good leaders make you feel safe

Now users can filter their search by target competence, language and type of material (online course, article, video or website). The concept of groups has been introduced in this version. Now teachers can create groups of students around a set of OERs.

Teachers can explore their group's dashboard to monitor students' progress as well as the OERs' activity, their comments and their ratings. This features imply an important added value to improve the usability and engagement of the platform.

Thank you very much for the attention!
